

QUALITY POLICY

The following Quality Policy is implemented in the PIAP Space's Quality Management System in accordance with the ISO 9001:2015 and is continuously reviewed for adequacy and updated when needed.

PIAP Space provides high quality management, work organisation environment, systems engineering, design, development, manufacturing, assembly and tests in the scope of space technology and robotics for space industry through Europe and beyond. The main directive of PIAP Space is to provide high-quality, safe and environmentally responsible products and services that meet or exceed customer expectations.

The company has developed its capabilities since establishment and aims to achieve flight level standards of its products and services. PIAP Space strive to improve the efficiency of activities and continuously build the company position on the market.

To enhance customer satisfaction and ensure reliable products, PIAP Space has implemented, maintains and continuously improves a Quality Management System with a strong customer focus consistent with the ISO 9001:2015 standard, tailored ECSS and customer requirements.

PIAP Space takes care of its employees by an inspiring and supportive work environment. We prioritize the professional development and satisfaction of our employees by offering various training and development opportunities. The Executive Board, Directors, Managers and all employees are responsible for implementing the Quality Policy and seeking constant improvements, with a focus on client feedback.

Marcin Dobrowolski
